

Patient Name _____

Following our discussions today, the treatment I have recommended for you is show below:

Venous Duplex Ultrasound Scan Required beforehand? Yes / No
1 Leg - £175.00 2 Legs - £310.00

The scan will take place at the Nottingham Woodthorpe Hospital, 748 Mansfield Road, Nottingham NG5 3FZ. If you haven't been given an appointment for this today, my Secretary will contact you to arrange this either by a conversation or by a diary system called 10to8. The fee for the scan will need to be paid on arrival at the hospital.

Procedure Name	Procedure Code	Awake (LA) Nottingham Woodthorpe Hospital	Asleep (GA) BMI The Park Hospital	Asleep (GA) The Spire Hospital
Endovenous Ablation(VNUS) and Multiple Avulsions (Information Sheet V11)	L8540	1 Leg - £2358.00	£3214.00	£3200.00
	L8541	2 Legs - £3065.00 *	£4287.00 *	£4200.00 *
Multiple Avulsions (on their own) (Information Sheet V03)	L8750	1Leg - £1466.00	£2166.00	£2135.00
	L8751	2 Legs - £1866.00	£3015.00	£2925.00
Foamed Sclerotherapy (Information Sheet V14)	L8620	1 Leg - £1128.00	N/A	N/A
	L8621	2 Legs - £1922.00	N/A	N/A
Microsclerotherapy	L8600 (1 Leg) L8680 (2 Legs)	£267.00 per ½ hour session	N/A	N/A
Temporal Artery Ligation		£1240.00	£1845.00 (LA)	N/A

**If only one leg has VNUS and both legs Multiple Avulsions, the cost is the same as having both legs treated with VNUS and multiple avulsions due to the cost of the equipment used.*

Once the date is confirmed you will receive a letter confirming details of your procedure. The fee for the procedure, quoted above, is a 'Package Price' and includes the clinic/hospital fee and doctor's fee.

For Varicose Veins procedures you will need to purchase some full-length, Class 2 open-toed (Moderate 18-24 mmhg) compression stockings to wear following your procedure. These can be obtained from a company called Daylong either via the internet from their website www.daylong.co.uk or by calling their customer services department on 0800 195 0160. These will be put on after your procedure. An alternative would be to contact your GP to see if he would be happy to prescribe these for you.

Enclosed with this letter are:

Directions to Nottingham Woodthorpe Hospital

EIDO information sheet to be read prior to your procedure (if appropriate)

Post-Operative instructions for information

Further information is available on my website www.bdb.org.uk

For any further information you can contact my Secretary on 07967 636769 or email dawn.reszke@ntlworld.com.

P T O

Revised January 2018

website: www.bdb.org.uk

Practice Manager: Dawn Reszke - Tel 07967 636769 Email: dawn.reszke@ntlworld.com

Correspondence Address: BMI The Park Hospital, Sherwood Lodge Drive, Burntstump Country Park, Arnold, Nottingham NG5 8RX

What is included in your payment

The fees are for the specified treatment only but not for a specified outcome. Therefore no refunds are applicable.

Foam Sclerotherapy

The payment includes all materials for the treatment, including bandages, but not the stockings (which can be purchased on line or direct from Veincare).

In the rare event that it is necessary, a second treatment will be provided without additional charge if it takes place within 6 months of the first treatment, unless a longer period of time is specified by the treating consultant in their letter to your GP.

Microsclerotherapy

The payment includes all materials for the treatment but not the stockings (which can be purchased on line or direct from Veincare). The payment is for one session only lasting up to 30 minutes or the maximum recommended dose.

Endovenous Ablation and / or Avulsions

The payment includes all materials for the treatment but not the stockings (which can be purchased on line or direct from Veincare). If you wish to be seen for a follow up appointment then the normal fee will apply.

If any additional procedures are required for residual veins or spider veins then a further fee will be payable, according to the fee schedule.

Temporal Artery Ligation

The payment includes all materials for the treatment and if required, a second procedure within 6 months, should the artery not have settled completely.
